AN IMAGINATION CONSTELLATION
CREATED AT 4S SEATTLE 2025

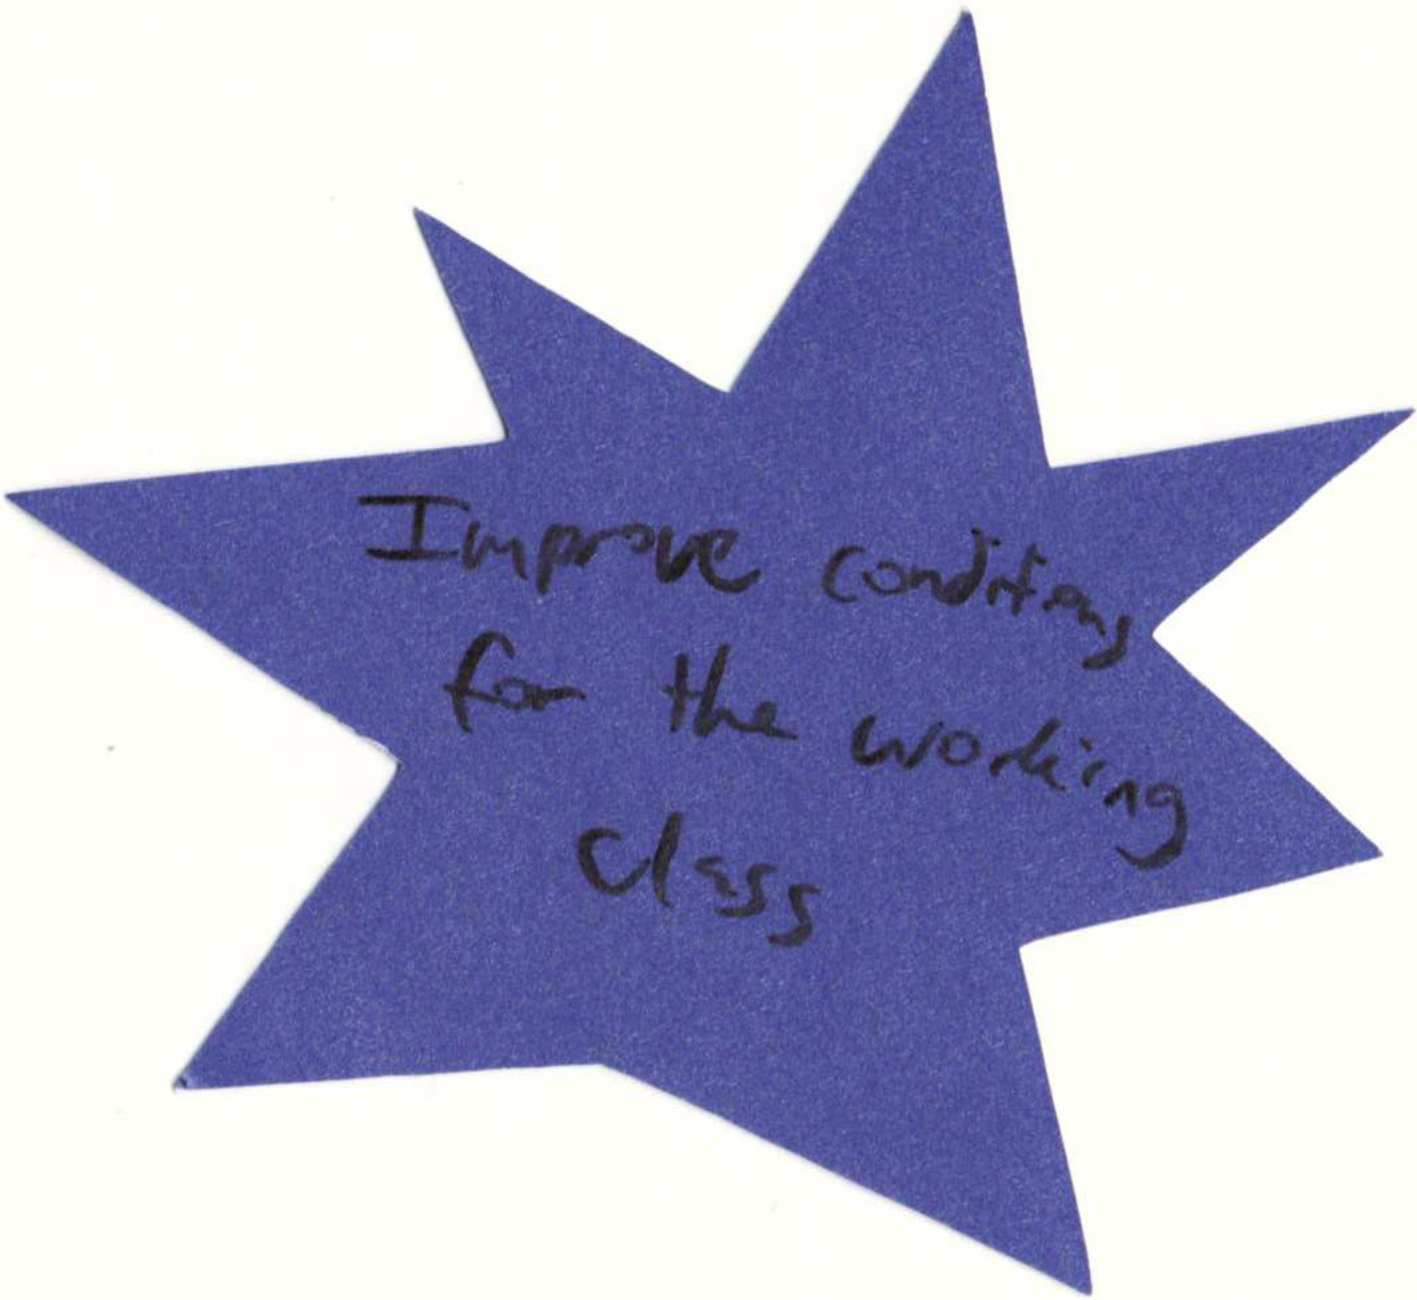

At 4S Seattle 2025, we
invited participants to write
a short message on a star in
response to the question:

“In my imagined future,
research is...”

Together, these stars form an
“imagination constellation”
of alternative techno-
futures: glimpses of how we
might reimagine research and
its many possibilities.

Consciousness

A brown, textured star-shaped sticker is centered on a cream-colored, diamond-shaped piece of paper. The word "Sustainable" is written in black, cursive-style handwriting across the middle of the star. Above the word, there are four short, slightly curved black lines. Below the word, there are four similar short, slightly curved black lines. The entire composition is set against a plain white background.
